Agenda

What we'll cover in the next 20 minutes

01 **The opportunity**
Why this matters for the CEO and the year

02 **Where we are today**
Headline KPIs and the current viewership shape

03 **User & usage trends**
Monthly, daily, hourly and time-of-day patterns

04 **What drives consumption**
Channels, demographics and geography

05 **Content recommendations**
Programming for low-consumption days

06 **Growth initiatives**
Acquisition and retention plays for CVM

07 **Roadmap & next steps**
90-day plan, owners and measurement

EXECUTIVE SUMMARY

What the data is telling us

Five things the CEO needs to know before we get into the detail

SESSIONS ANALYSED

10,000

Jan – Apr 2016, SA time

TOTAL WATCH TIME

1,523 hrs

≈ 91k minutes across all channels

AVG SESSION

9.1 min

Saturday peaks at 10.9 min/session

TOP REGION

Gauteng

37% of sessions; +WC = 55%

- Demand is accelerating: monthly sessions grew +119% from January to March — we have momentum to ride.
- Consumption is concentrated in Evening Peak (17:00–21:00), Saturday, and Live Sport — these drive the business.
- Engagement is unequal: ICC Cricket (16.9 min) and Trace TV (12.1 min) far outperform kids/news on session length.
- Audience is skewed: 88% Male, 77% Young Adults & Adults, 55% in Gauteng + Western Cape — large white-space in Female and outer provinces.
- Mondays and early-morning hours are structurally weak — a clear programming and CRM opportunity.

01 · THE OPPORTUNITY

Where BrightTV stands today

Snapshot of the audience and engagement we are working with

SESSIONS

10,000

Jan–Apr 2016

UNIQUE-ISH USERS

≈ 8.6k

active in the window

CHANNELS

19

linear + sport + kids

PROVINCES COVERED

9

all SA provinces

AVG SESSION

9.1 min

10.9 on Saturdays

PEAK HOUR

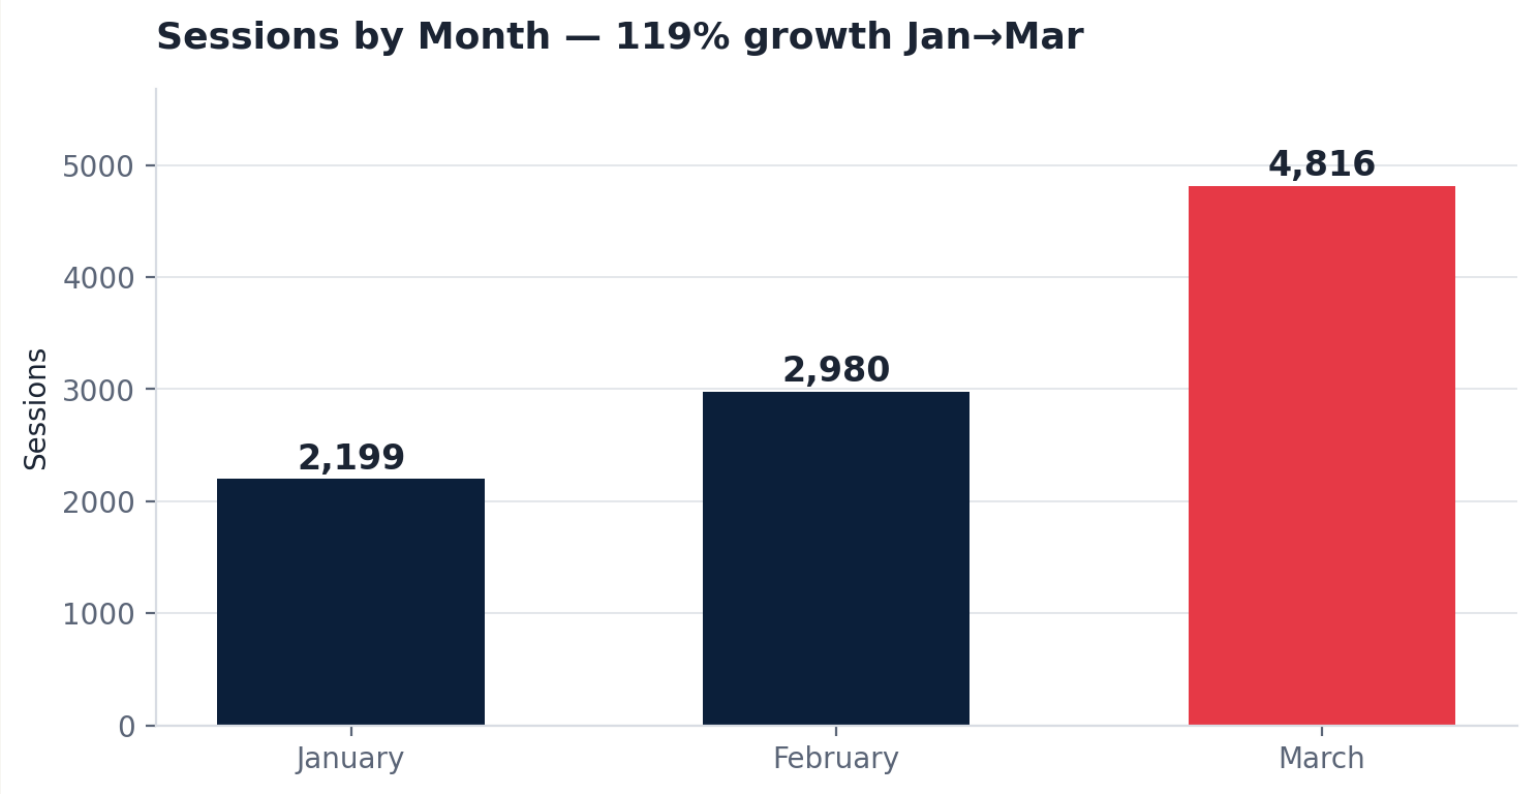
17:00

evening prime drives 32% of sessions

02 · USER & USAGE TRENDS

Demand is accelerating

Monthly sessions more than doubled from January to March



WHAT IT MEANS

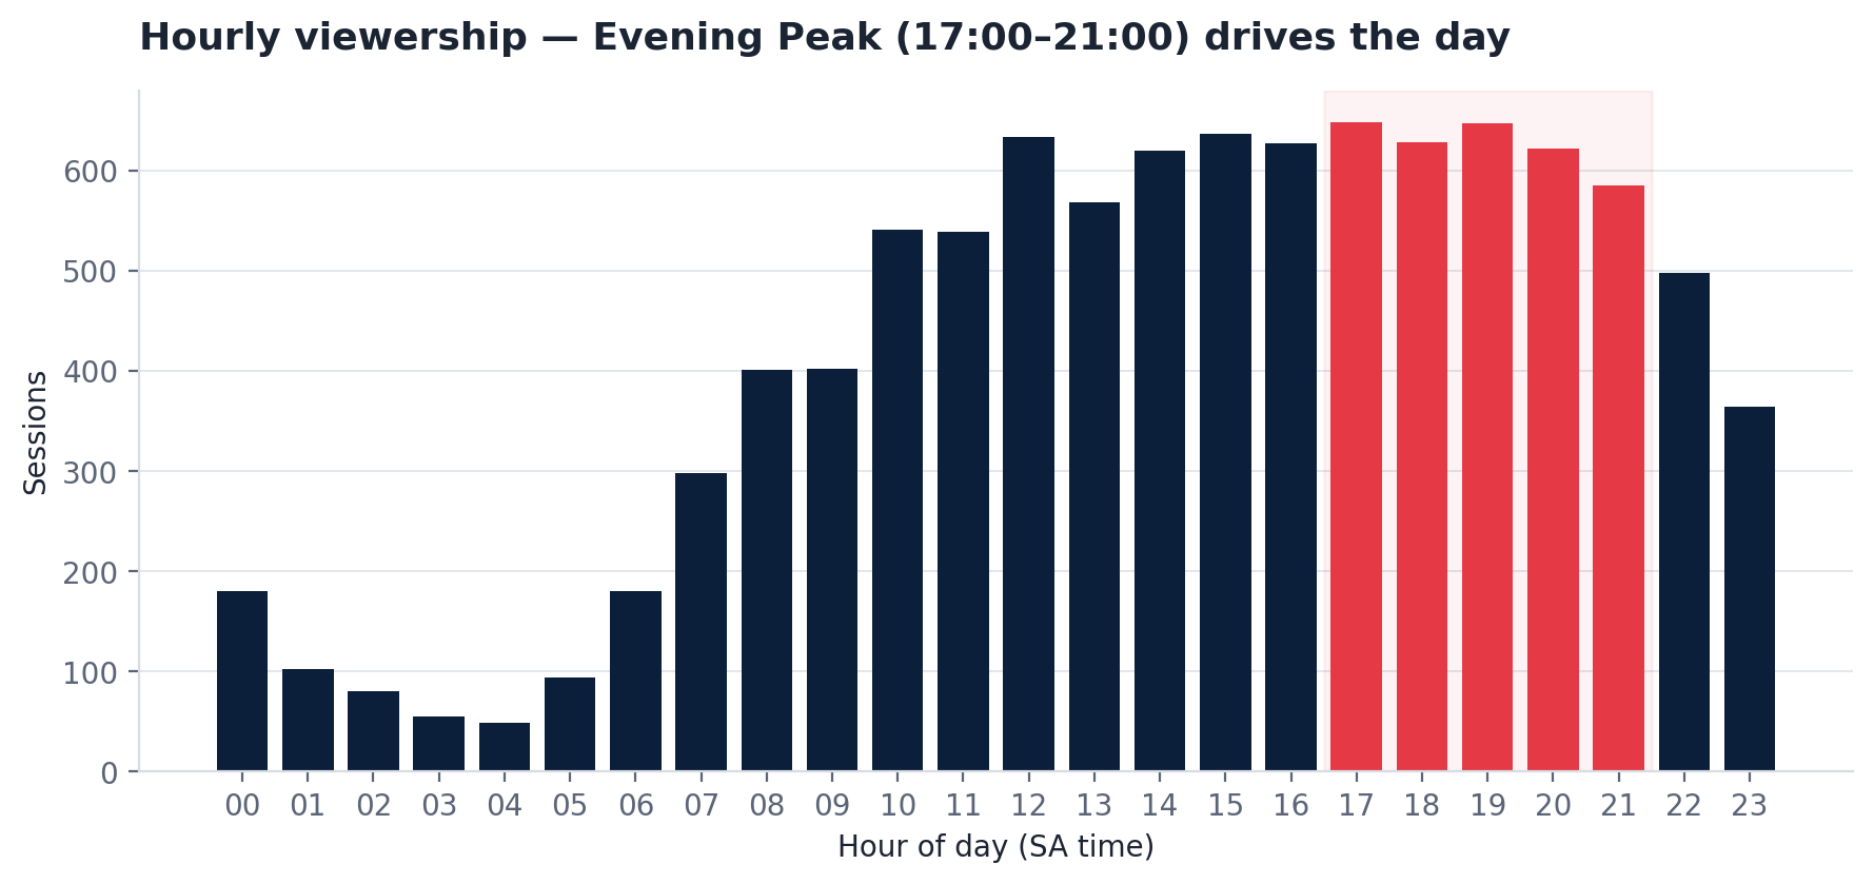
Momentum is real — but fragile and event-driven.

- ICC Cricket World Cup window inflated March — separate steady-state from event spikes.
- Build always-on programming so we don't lose users between sport tent-poles.
- Use this growth to set Q3 acquisition targets at +60–80% over Q1 baseline.

02 · USER & USAGE TRENDS

Evening Peak is the heartbeat

17:00–21:00 dominates — early hours under-utilised

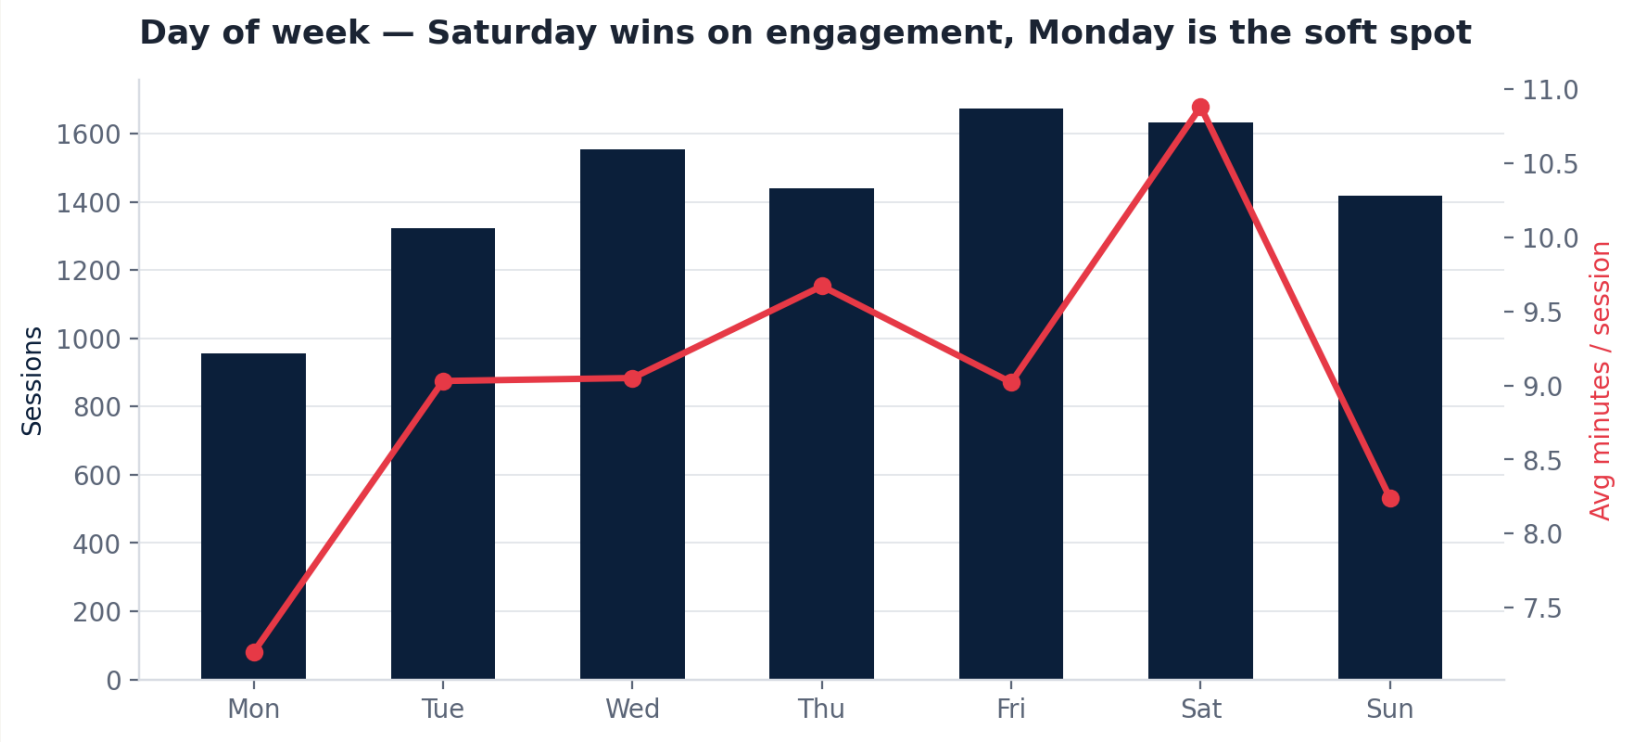


Insight: Hours 12–22 deliver 73% of sessions. Hours 00–06 are <8% — a CRM-able window with low-cost catch-up content.

02 · USER & USAGE TRENDS

Saturday wins, Monday struggles

Engagement (avg minutes) is highest on Saturday; Monday lags on both volume and depth



READ

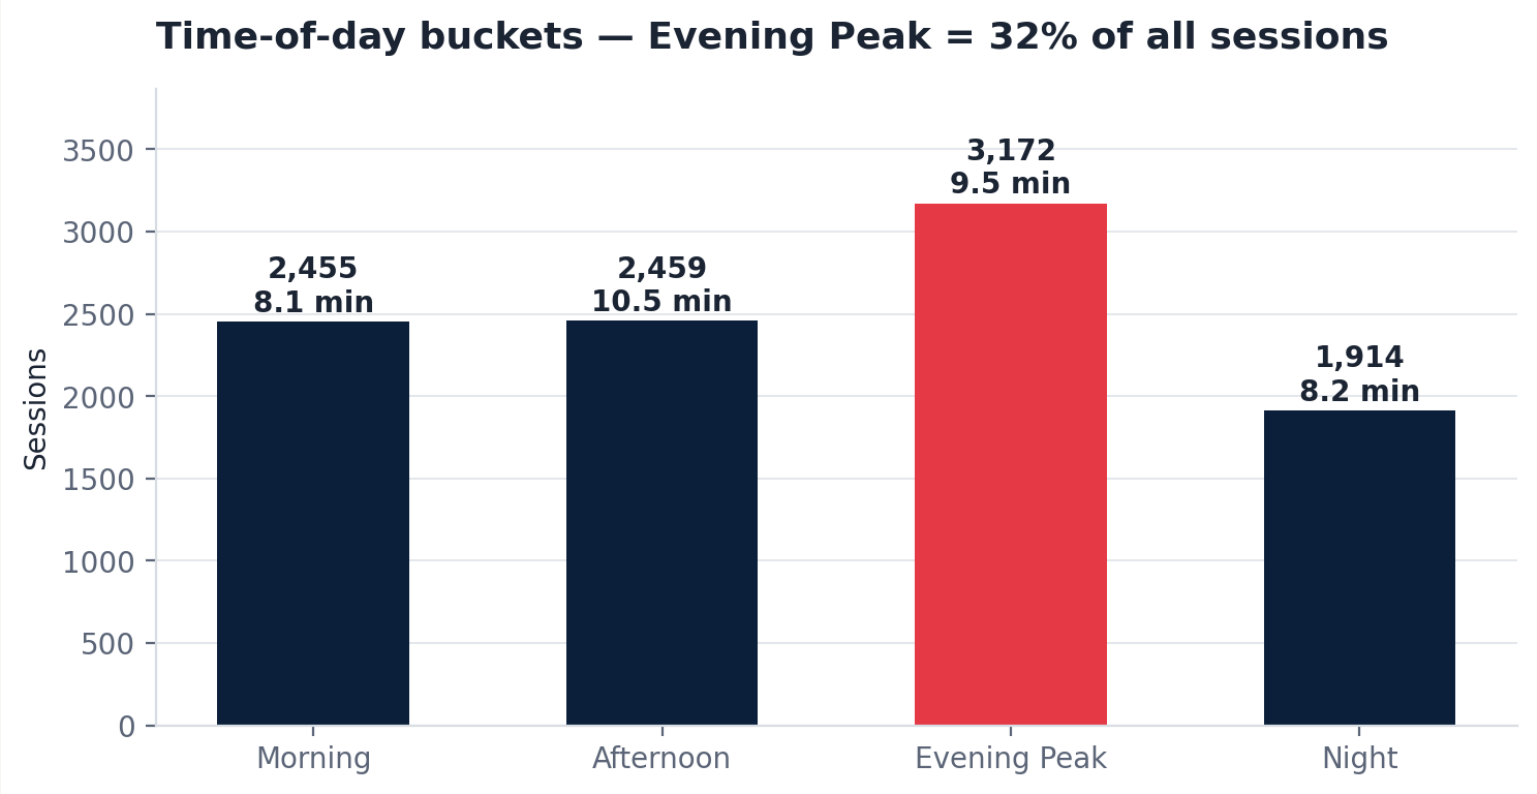
Two opposite problems

- Monday: low volume (957) AND low engagement (7.2 min) — needs a tent-pole show.
- Saturday: highest engagement (10.9 min) — protect with premium sport + lifestyle.
- Mid-week is consistent — ideal for series/serial content to build habit.

03 · WHAT DRIVES CONSUMPTION

Time-of-day buckets

Evening Peak = 32% of sessions; Afternoon delivers the longest sessions (10.5 min)



PROGRAMMING IMPLICATIONS

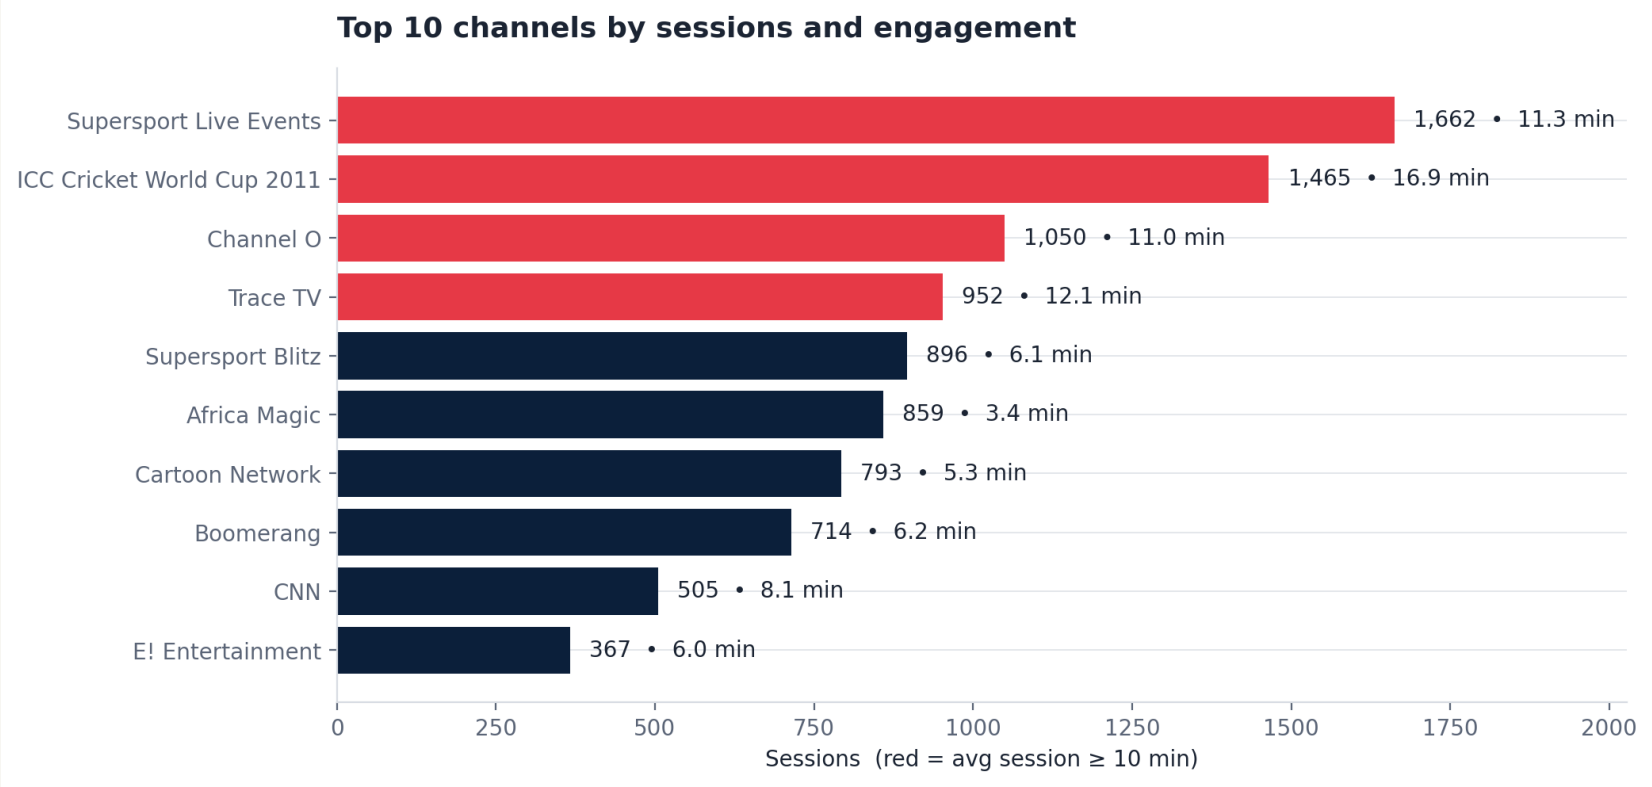
Match content to mood

- Morning: short-form news/highlights — sessions are shorter (8.1 min).
- Afternoon: longest sessions — schedule movies and binge-able series.
- Evening Peak: live sport + flagship entertainment — protect ad inventory.
- Night: quality drama and replays — low cost, high engagement potential.

03 · WHAT DRIVES CONSUMPTION

Top channels — sessions vs. engagement

Live sport and music drive both reach AND time spent



WINNERS

Sport + Music = scale

- ICC Cricket: 1,465 sessions × 16.9 min — the single biggest engagement engine.
- Trace TV: 952 sessions × 12.1 min — strongest non-sport performer.
- Channel O & SS Live Events: scale + 11+ min.

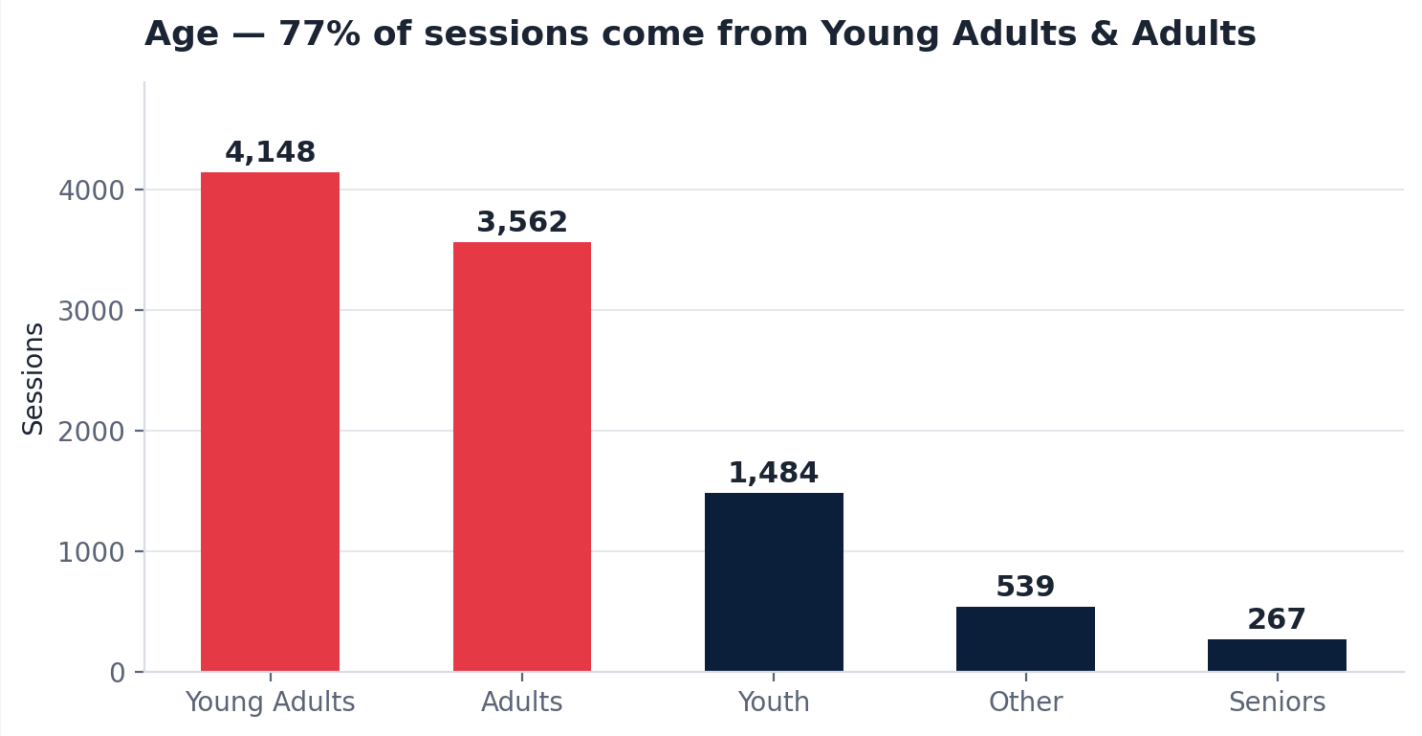
WATCH-OUTS

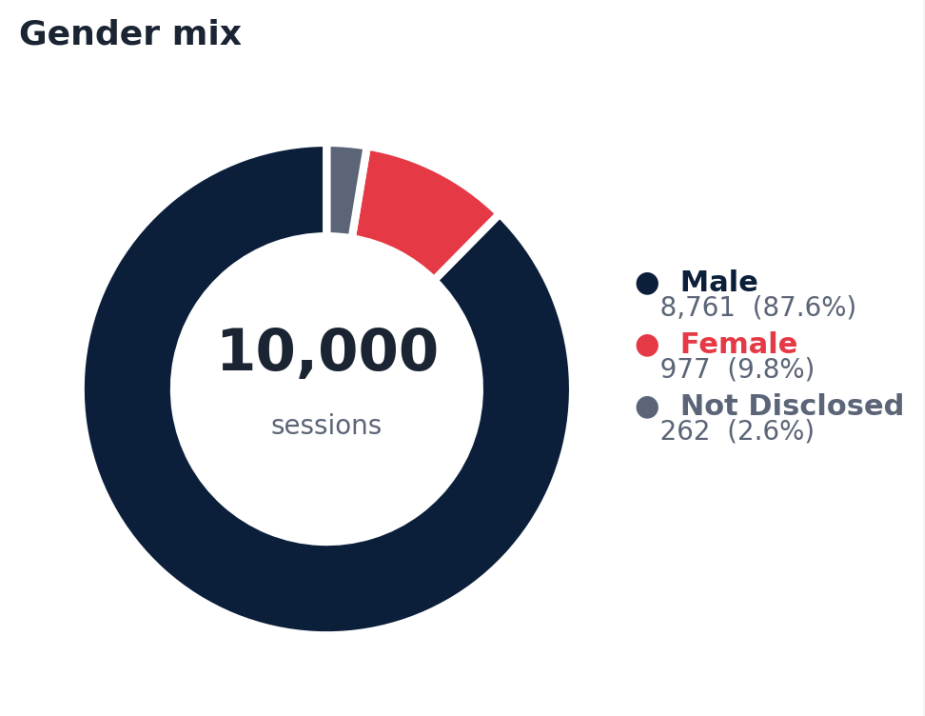
- Africa Magic: high reach, low engagement (3.4 min).
- Vuzu, M-Net, Sawsee: <2.5 min — review schedule.

03 · WHAT DRIVES CONSUMPTION

Who is watching

Audience skews young-adult and male — a clear under-served Female opportunity



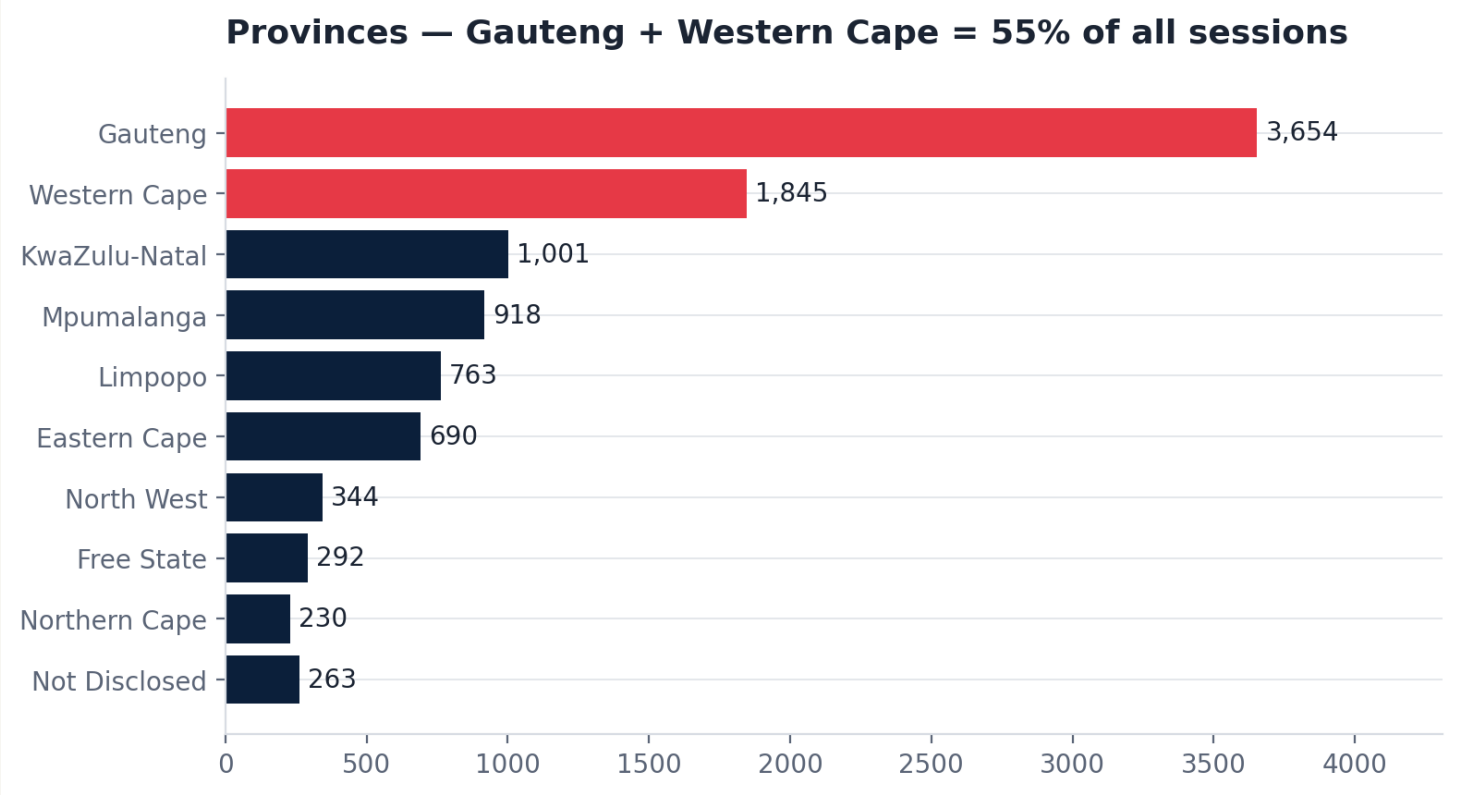


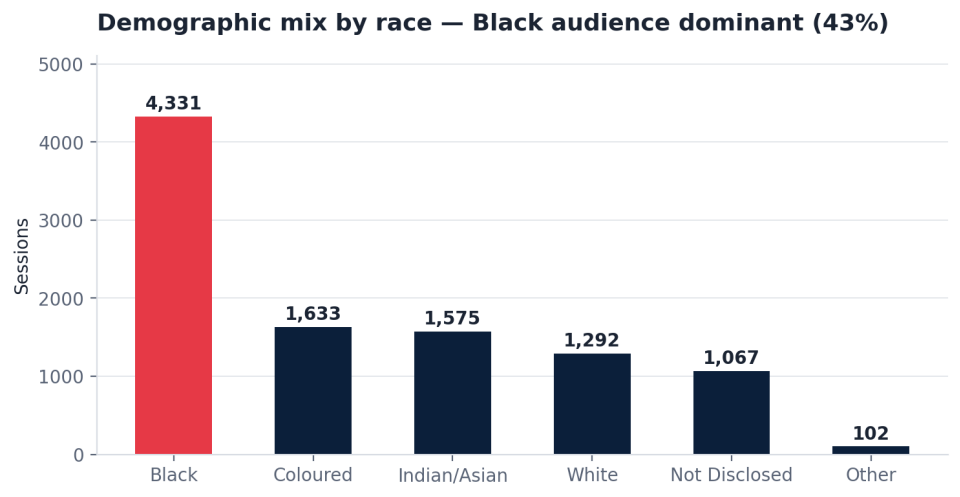
Implication: Female viewers represent only 10% of sessions but South Africa's TV market is ~50/50 — biggest growth lever in the deck.

03 · WHAT DRIVES CONSUMPTION

Where they're watching

Two metros do the heavy lifting; six provinces are growth territory





04 · CONTENT RECOMMENDATIONS

Programming for low-consumption days

Targeted slate to lift Mondays, mornings and the weekday daytime block

MONDAY — SOFT SPOT

Build a 'Monday Night Premiere' ritual

- Premiere a returning local drama or reality format at 19:30.
- Live sport doubleheader (PSL midweek) on Supersport partner channels.
- CRM push at 17:00: 'Tonight on BrightTV' personalised by genre.
- Promo bundle: Mon premiere + Tues recap to lift Tuesday tail.

MORNINGS 06–10

Capture commuters & at-home audience

- Daily 30-min news + business wrap (CNN-style) with SA lens.
- Kids breakfast block on Boomerang / Cartoon Network — ad-funded.
- Music video power-hour on Channel O / Trace TV (proven engagement).
- Push notifications at 06:30 with day's highlights.

DAYTIME WEEKDAYS

Lengthen the longest-session window

- Movie matinee (12:00–15:00) — afternoon already averages 10.5 min/session.
- Telenovela strip in Africa Magic slot — lift its 3.4 min/session weakness.
- Replay flagship sport from previous evening (11:00–13:00).
- E! Entertainment lifestyle marathon for Female-skew growth.

05 · GROWTH INITIATIVES

Plays to grow the user base

Acquisition + retention initiatives — sized to the gaps the data reveals

01 Win the Female audience

Female-led lifestyle, telenovela and music programming block; influencer-led acquisition campaign on Facebook & TikTok in GP/WC.

KPI: Female sessions from 10% → 25% in 12 months

02 Provincial expansion

Targeted on-the-ground + digital push in KZN, Mpumalanga and Limpopo with local-language content and retailer partnerships.

KPI: Sessions outside GP/WC +40% YoY

03 Sport tent-pole strategy

Lock multi-year rights and build always-on programming around them; convert event spikes into subscription habit.

KPI: Post-event 30-day retention >70%

04 CRM 'win-back Mondays'

Behavioural triggers for users with no Monday session in last 4 weeks; personalised 'Tonight on BrightTV' push and email.

KPI: Monday sessions +25%

05 Freemium on-ramp

Free ad-supported tier with morning/news + kids block to acquire trial users; upsell to full tier after 14 days of habit.

KPI: Trial → paid conversion ≥ 18%

06 Recommendation engine

Use session/channel data to personalise the homepage; lift avg session minutes — especially in low-engagement channels.

KPI: Avg session 9.1 → 11.0 min

06 · ROADMAP

What we do in the next 90 days

Four workstreams, clear owners, measurable outcomes

	Days 0–30 Diagnose & set baselines	Days 30–60 Pilot & instrument	Days 60–90 Scale what works
WORKSTREAM	PRIORITY	PRIORITY	PRIORITY
Content	Lock Mon premiere + matinee slate; brief Africa Magic refresh	Launch Monday tent-pole; morning kids+news block live	Roll out telenovela strip; measure session uplift
Audience	Build Female + KZN/MP/LP segments; baseline Monday inactives	Pilot win-back Monday CRM; influencer test in GP/WC	Scale top-performing creative; expand to LP/EC
Product	Spec freemium on-ramp + recommendation MVP	Beta freemium tier; A/B home recommendations	GA freemium; personalised home for all users
Insight	Daily DAU + session dashboard for CEO	Cohort retention by acquisition source	Quarterly readout + 12-month plan to Board

Three decisions today, to unlock the year.

01 **Fund the Female-audience growth play**

Programming + acquisition budget for Q3 — biggest white-space in the data.

02 **Approve the Monday tent-pole + freemium pilot**

Two pilots that directly attack our weakest day and our weakest funnel.

03 **Endorse the CEO insight cadence**

Weekly DAU/session dashboard and a monthly CVM readout to this office.

Thank you.
